

Web Process

Impression + Information + Searchability = BUSINESS RESULTS

Discovery	Architecture & Design	Development	Launch
<p>Garrison Everest gathers the necessary requirements for the project. We seek to understand where you are now and where you want to go. Taking care to understand your goals and objectives online.</p>	<p>After the goals, specifications and requirements have been gathered we move into designing the sites architecture. An easy and intuitive navigation is crucial to your websites' success. We focus on concepts that bring impression, usability, searchability and simplicity in clean professional designs.</p>	<p>In the development stage, the design files are handed off to the development team to implement the code and back-end systems to make the website come alive. Prior to launch - a BETA site is posted to be tested and edited to ensure your expectations and goals are met.</p>	<p>At launch we make sure your team understands the file structure, the technology, and how the website functions. We will train you on any site functions or CMS components installed to ensure a smooth transition. We monitor the site for 30 days after launch to guarantee all aspects are working properly.</p>
